

you will see two feeds, one is the default, which is for you, and the other is the explore page which is similar to the top feed on Instagram where you can find your friends.

The TikTok app is simple, though. What happens is that you see a video, and you like it, you can easily follow the person who made the video by going to their account and supporting them. Then, you can comment on and share the video. You can leave it at that, or you could get inspired and decide to make a video yourself.

In the latter case, your option is to create a new video on the app by clicking on the plus sign. Then, the app will access your camera and recorder. Once your camera and recorder are open, you will need to pick the timer for the video, the speed at which your video should play, add beauty effects, filters, results, and a long-press the red button to start recording the video.

When you have the app open, you will also be able to add text to the video, or logos as you please. You must then choose a piece of music to add to your video.

You are not done yet, and you now have to edit the video by selecting less or more music, you can choose the video cover, the best still from the video, which will become the cover. After all this effort, you will begin to shine on this app.
