

Getting started

Get started with this global phenomenon that really needs no introduction

Introduction to TikTok

The Internet has emerged as one of the most powerful tools in the world. In fact, it is safe to say that it has the world captured in its fists. If it were to disappear today, more than three fourths of all the processes all around the world would come to a dizzyingly horrifying halt. All communication systems would collapse and so would everything else.

Although the Internet itself is a vast topic of discussion and is of pivotal significance, it has demarcations within its line of work. Not all facets of the Internet assume as important a role as the others.

Social media, however, falls in the category of the most important features of the Internet. These platforms are the connecting threads between people from all over the world. These are the ones that have made the world a much smaller place.
