

IS NOT NULL	NOT NULL value test
IS NULL	NULL value test
ISNULL()	Test whether the argument is NULL
LEAST()	Return the smallest argument
LIKE	Simple pattern matching
NOT BETWEEN ... AND ...	Whether a value is not within a range of values
NOT IN()	Whether a value is not within a set of values
NOT LIKE	Negation of simple pattern matching
STRCMP()	Compare two strings

Now, we are going to study these Comparison operators with examples-

OPERATOR	DESCRIPTION	OPERATES ON
=	Equal to.	Any compatible expression or data types
<>	Not equal to.	Any compatible expression or data types
>	Greater than.	Any compatible expression or data types
<	Less than.	Any compatible expression or data types
>=	Greater than equal to.	Any compatible expression or data types
<=	Less than equal to.	Any compatible expression or data types

Common syntax used in these Comparison Operators:

```
SELECT [column_name | * | expression] <comparison operator>
[column_name | * | expression ]
FROM <table_name>
WHERE <expression> [comparison operator] <expression>;
```

Parameters:

- column_name: A particular name of the column of the table.
- * that indicates all the columns of a particular table
- expression:
- table_name: A particular name of the table.
- comparison operator: That can be Equal (=), Not Equal (<>), less than, greater than, greater than or equal to(>=), less than or equal to (<=)
