

Syntax: `expr BETWEEN min AND max`

If the expression is greater than or equal to min and expr is less than or equal to max, BETWEEN will return 1, on the other hand, it will return 0. In the following example, we are looking to retrieve the rows from the table publisher that were established between the years 1968 and 1975.

PUB_ID	PUB_NAME	PUB_CITY	COUNTRY	COUNTRY_OFFICE	NO_OF_BRANCH	ESTD
P001	Jex Max Publication	New York	USA	New York	15	1969-12-25
P002	BPP Publication	Mumbai	India	New Delhi	10	1985-10-01
P003	New Harrold Publication	Adelaide	Australia	Sydney	6	1975-09-05
P004	Ultra Press Inc.	London	UK	London	8	1948-07-10
P005	Mountain Publication	Houston	USA	Sun Diego	25	1975-01-01
P006	Summer Night Publication	New York	USA	Atlanta	10	1990-12-10
P007	Pieterston Grp. of Publishers	Cambridge	UK	London	6	1950-07-15
P008	Novel Publisher Ltd.	New Delhi	India	Bangalore	10	2000-01-01

```
SELECT pub_name, country, pub_city, estd
FROM publisher
WHERE YEAR(estd) BETWEEN 1968 AND 1975;
```

Output Statements will be:

```
mysql> SELECT pub_name, country, pub_city, estd
-> FROM publisher
-> WHERE YEAR(estd) BETWEEN 1968 AND 1975;
```
