

```
SQL> SELECT * FROM CUSTOMERS
WHERE SALARY LIKE '200%';
```

ID	NAME	AGE	ADDRESS	SALARY
1	Ramesh	32	Ahmedabad	2000.00
3	Kaushik	23	Kota	2000.00

Yet another example to explain the % operator. To fetch records from Student table with a NAME ending with letter 'T'

```
SELECT * FROM Student WHERE NAME LIKE '%T';
ROLL_NO
NAME
ADDRESS
PHONE
Age
3
SUJIT
ROHTAK
XXXXXXXXXX
20
```

To fetch records from Student table with NAME ending any letter but starting from 'RAMES'.

```
SELECT * FROM Student WHERE NAME LIKE 'RAMES_';
```

The result will be:

```
2RAMESHGURGAONXXXXXXXXXX18
```

The table below provides some examples where WHERE has different LIKE clauses with '%' and '_' operators:

Sr.No.

Statement & Description

```
WHERE SALARY LIKE '200%'
```

Finds any values that start with 200.

```
WHERE SALARY LIKE '%200%'
```

Finds any values that have 200 in any position.

```
WHERE SALARY LIKE '_00%'
```

Finds any values that have 00 in the second and third positions.

```
WHERE SALARY LIKE '2_%_%'
```

Finds any values that start with 2 and are at least 3 characters in length.
