

bars that we see around the internet, this one, too, is placed at the top and is horizontal in form. This tab bar displays the name of the project on one side and the name of the Actor that is being worked on, on the other side. This helps designers keep track of what they are working on.

- **Menu Bar:** We have all used Windows at least once in our lifetime. The menu bar, therefore, is nothing new to us. In fact, the menu bar present in the Level editor of the Unreal Engine is very similar to the menu bar we see on Windows. It contains all the necessary options that a designer requires while processing the Actors. There are little icons on the menu bar that depicts the options available to the designers. This is especially helpful while modifying the attributes. There are shortcuts which can be used to do the same work.

- **Tools Bar:** The Tools Bar is a bar whose usage is clear from its name. It provides direct access to all the tools that are available to designers for the modification or creation of Actors. The Tools Bar displays all the essential tools that are required to finish the necessary tasks at hand. For each character, these tools may differ. Hence, the tools bar will change to show whatever is relevant.

- **Viewport:** A Viewport is an interesting thing to keep in mind while creating or designing the different worlds. A viewport is like a window
