

to all the worlds. These can be seen together on the same screen but on different windows, or these can be seen separately. The worlds can be seen from any perspective and angle. There are three conventional angles. These are the back view, front view, and side view. Nonetheless, the structures can be visible from any direction so that the designers can do a better job.

- **Details Panel:** The Details Panel is the panel that provides a lot of information about the game, and it's Actors. It is one of those panels which provide quick access to the tools and other objects that the designers are currently working upon. Given how easy this particular panel makes it for the designers, it is one of the most helpful tools the team works with. We will discuss more about the Details Panel later in the article.
- **Modes:** The Level Editor has several modes. These allow the designers to perform specific functions pertaining to the Actors present in the game. Some of these modes are the Paint mode, Landscape mode,
