

After all the initial set up, it is easy for us to make the character programming with variables like health, armour, speed, damage and so on. It also has functionalities to apply damage and die function.

Unreal gives you felexblity to create characters with various functions

```

• #pragma once
•
• #include "CoreMinimal.h"
• #include "GameFramework/Character.h"
• #include "RTSBR_Character.generated.h"
•
• class Damage
• {
• public:
•     Damage() : physicalDamage(0.f), magicDamage(0.f)
•     {}

```
