

uTorrent

Under the minimalist interface,
uTorrent sports a ton of features

As the internet is becoming more transparent and diluted, it is becoming a platform where you can find anything under the sun. From shopping websites to visual content, it has a search result for everything. Content has become easy to acquire with software helping us to do it. One such software is uTorrent.

uTorrent is a software which provides you with a platform to share as well as download torrent files.

It was launched in the year 2005 and is one of the oldest torrent files which is responsible for storing metadata for the peer-to-peer file sharing communication protocol, BitTorrent. The services, most of which are free, boasts of about more than 100 million users worldwide.

File transfer on this network is fast and reliable as it helps you to download your content from people who already own it. This uses
