

loads or your uploads. Thus, it earns only from advertisements on this interface which can be irritating while you are going about doing something important. Using the paid version helps you get rid of this. It gives you an ad-free platform to download and upload content.

- **HD Media Player:** The paid version of uTorrent allows you access an HD Media Player which plays file as and when you download it or when the process is going on. It can also play the video files from your system, thus, it is not limited to the files downloaded on uTorrent. This also gives you a chance to test the video file before downloading it.
- **Media Conversion:** uTorrent Plus allows you to convert your media to be compatible for different platforms such as iPhone, Xbox, Android and others. This allows you to play your media files on the device that you possess and eliminates the factor of non-compatibility of your media file.

uTorrent Plus is currently available only on Windows Operating System and can be installed by only two methods. Here are the methods by which you can enjoy uTorrent Plus.

1. You can easily buy and use uTorrent Plus from <http://www.utorrent.com/utorrent-plus>. Here, you can get it for ₹1874 or \$19.95 for a year.
2. If you have already installed the free version from <http://www.utorrent.com/utorrent-plus>, then you can upgrade your uTorrent account by going to Options and then click on Get uTorrent Plus.

Apart from these features, uTorrent allows you to control your downloads remotely as well. This eases your mode of operation while downloading your favourite content.

Shedding light on uTorrent Plus's Remote File Access Feature or uTorrent WebUI Feature, it makes for one of the most flexible and innovative features of a BitTorrent client.

If you are an avid user of uTorrent, you can control your downloads even when you're away from your desktop. You can do all these things just from a simple full-featured web interface.

Here are the steps which you can follow to install this interactive feature.

1. For the first step, you need to install the free or the paid version of uTorrent.
