

2. After installation of uTorrent, click on Ctrl+P or Options and then go to Preferences.
3. Click on Advanced Settings and click on WebUI to enable WebUI.
4. A pop-up box comes up in which you have to enter your desired Username and Password and change the port to 7070 or you can add specific folders to be downloaded by clicking Add and then approving the addition by clicking on Apply and then on Ok.
5. Open your Web Browser and open <http://ip.address:7070/gui> and log into it by entering your User Name and Password.
6. A prompt comes up which will let you download the WebUI files depending on the uTorrent version currently used by you. If the link doesn't work, then your uTorrent version might not be the latest one, you need to upgrade it and again start from the beginning.
7. After this, you need to reload the address <http://ip.address:7070/gui>.
8. A screen pops up wherein you have to find a torrent somewhere and copy the Magnet Link onto the Clipboard.
9. You can add Magnet URLs in the WebUI.

Your uTorrent Web UI has been set-up completely and you can access uTorrent remotely with the help of its public IP Address. You can get your IP address from <http://www.whatsmyip.net> from the computer on which uTorrent has been installed.

On your remote access system enter this link which goes by <http://your-public-ip-address:port:/gui/> onto the address bar of your browser.

Other than your remote browser on some other PC, you also use the same thing on your mobile phone as well as it will serve a better purpose for setting up this feature.

So next time when you are returning from your office and can't wait to catch up on your favourite TV show or movie, you can easily afford to set it up with the help of WebUI.

Thus, uTorrent is one of the most flexible options that you got when it comes to accumulating content for your entertainment and educational purposes. It follows several encryption policies to keep you safe from downloading malicious content.

uTorrent Plus comes with additional features which will give you a more reliable way to download content and use it for your purposes. It also provides you with an interactive interface with Media Player as well as Media Converter. In addition to this, it provides a ton of other features we have outlined above.
