

CSS Viewer Extension

CSS Viewer is an nifty extension on Chrome. It is a simple CSS property viewer providing a floating panel which gives the user a complete report of that particular section you are hovering your mouse over. From font, colour, text, to backgrounds and effects attributes, CSS Viewer helps knowing everything about the trait. Adding this extension to Chrome can be one of the best decisions mainly for those who are in the web development industry.

Salient Features of Chrome browser introduced with the new update

Tab Management Feature in Chrome

According to sources, Google Chrome has got the tab management feature from Microsoft Edge. Being the most loved browser till date, it now has planned to woo the users with another enticing feature. This new unique feature of Google Chrome allows simultaneous movement of several open tabs in a new window. However, it seems this update only appears in Chrome's Canary builds which has been noticed by one of the users. There are no official announcements by Google yet and therefore users are waiting to know more about it.

Changes in Samesite Cookies

Google Chrome 80 launched on February 4, 2020, and the highlight of the latest version is implemented secure-by-default cookie classification system which is created to treat cookies without a Samesite value. Based on what is mentioned in Google Chrome Blog, only cookies set as SameSite = None; Secure will be available in the third-party contexts. With the condition being, the cookies can be accessed from secure connections only. This one of its kind features Google offers to the users of the Chrome browser. This remarkable feature provides a secure browsing experience to the users.

Upgraded Dev Tools

Dev Tools, one of the famous extensions of Chrome, has now been augmented with the latest Chrome update. These changes and improvements include enhanced WebAssembly debugging, network panel updates, new user interface configuration and many more features. List of all the changes can be found on the official website of Google in the updates section.
