

VLC Media Player

The go-to video media player for most has a lot of features on offer

VLC is one of the most popular video media player software available for free download with over 2 billion downloads overall. VLC integrates seamlessly with files, devices, streams and webcams to offer users interrupted high video quality in no time.

Started as an academic project in 1986 as 'VideoLAN Client' where VLC was merely a client of the project. Now VLC is an open-source, free and cross-platform media player with developers contributing to the code globally, coordinated and maintained by VideoLAN (a non-profit organisation).
