

tion then you can also stream it through VLC as well. You can choose to stream from the Convert/Stream option from the File menu to enter URL then stream it via VLC to start enjoying.

Add Watermark to your Videos (Text or Logo)

With Video effects you can add any watermark to the video in the form of text or logo to assuring the originality of content inside. You can reach

there through top menu navigation under the Window > Video effects then Miscellaneous tab. You can also set the position and transparency of the logo as well.

Further upgrade with Add-ons and Extension

VLC features can be enhanced with several add-ons and extension to make it more purposeful. VLC is an open-source community and members have added a lot of skins, extensions, tools and parsers to this amazing media player. You can visit the official site by VLC organisation at <https://addons.videolan.org/>. You will find different options for Extension, Internet channels Playlist parsers, Plugins, Skins and Other items to add into your VLC software. Some of the best upgrades are Youtube Playlist, VLSub, VLT DeepDark, tvQu Online, Resume Media, etc.

Conclusion

VLC has gained a hugely positive reputation among users to play almost every audio and video format. Packed with amazing audio and video features, VLC is easy to download, comes with one-click install and is user-friendly to get started. VLC Media player now even offers 360-degree views and supports Chromecast too.
