

has a small memory footprint and is free. It doesn't replace professional grade software such as Adobe Lightroom and Photoshop but it has all the features that you would most commonly use. And the ability to add all the custom Adobe 8BF plugins simply means that you can even use it for those once-in-a-blue-moon tasks which might have otherwise required the use of a professional-grade software. You can find IrfanView in this month's DVD.
