

Discord

A feature-rich and better alternative to Slack that's also fun to use

Discord might have started off as an instant messaging and VoIP software for connecting gamers but it has evolved to become the go-to platform that video gaming communities are built around. Discord allows you to create and join communities, all you need is an invite.

Once you do join or create a community, you can really see how discord shines. You can create text and voice channels which can then be organised in whichever manner you choose. You can even livestream to your community.

However, the hero-feature of Discord is the ability to create bots. You can do a lot of different things using bots from simple tasks like replying and setting up macros to complex tasks like managing an entire server on its own including running moderation scripts, policing, refereeing
