Using a terminal

Here are a few examples of commands and the execution in the terminal.

1. **pwd** - Print Work Directory allows the user to keep track of the directory they are working on to avoid being lost.
2. **ls** - This command gives you the contents of a particular directory.
3. **cd** - Change Directory enables the movement from one directory to another.
4. **mkdir** - Make a new folder with this command.
5. **rmdir** - This allows you to delete a folder anywhere in the system.

You can also try some commands like

- displaying date

```
[me@linuxbox ~]$ date
Thu Oct 25 13:51:54 EDT 2007
```

- displaying time

```
[me@linuxbox ~]$ time
25 13:51:54
```

- displaying calendar

```
[me@linuxbox ~]$ cal
October 2007
Su Mo Tu We Th Fr Sa
 1  2  3  4  5  6
 7  8  9 10 11 12 13
14 15 16 17 18 19 20
21 22 23 24 25 26 27
28 29 30 31
```

- You can also see the space left in your disk

```
[me@linuxbox ~]$ df
Filesystem 1K-blocks Used Available Use% Mounted on
/dev/sda2 15115452 5012392 9949716 34% /
/dev/sda5 59631908 26545424 30008432 47% /home
/dev/sda1 147764 17370 122765 13% /boot
tmpfs 256856 0 256856 0% /dev/shm
```

- Same way you can also free up memory space

```
[me@linuxbox ~]$ free
total used free shared buffers cached
```
