

```
# netstat -lu : To list only the listening UDP ports
# netstat -st (TCP) : To list the statistics for TCP ports.
# netstat -su (UDP) : List the statistics for UDP ports.
# netstat -pt : To display the PID and program names
```

wget - Non-interactive network downloader

Wget command is a Linux command line utility that helps us to download the files from the web. We can download the files from web servers using [HTTP](#), [HTTPS](#) and FTP protocols. We can use wget in scripts and cron jobs. Wget is a non-interactive program so that it will run in the background. For example, to simply download a webpage, syntax of the command is as follows-

```
wget [option] [URL]
wget http://example.com/sample.php
To download the file in background
wget -b http://www.example.com/samplepage.php
To overwrite the log file of the wget command
wget http://www.example.com/filename.txt -o /path/filename.txt
To resume a partially downloaded file
wget -c http://example.com/samplefile.tar.gz
To try a given number of times
wget --tries=10 http://example.com/samplefile.tar.gz
```

ssh - OpenSSH SSH client (remote login program)

Almost every Unix and Linux system includes the ssh command. It is used to start the SSH client program that enables secure connection to the SSH server on a remote machine. It is used for logging into the remote machine, transferring files, and for executing commands on the remote machine.

```
ssh-keygen - creates a key pair for public key authentication
ssh-copy-id - configures a public key as authorized on a server
ssh-agent - agent to hold private key for single sign-on
ssh-add - tool to add a key to the agent
scp - file transfer client with RCP-like command interface
sftp - file transfer client with FTP-like command interface
sshd - OpenSSH server
```

In this chapter, all the basic concepts related to Storage and Networking aspects in Linux have been explained distinctively. All types of versatility in functionalities and attributes that Linux provides in domains of storage and networking have been included. **d**
