

On the left, the Inspector menu with Playground off, on the right, the Inspector menu with Playground on.

Transform, Rigid Body and Camera. Note that redrawing the Inspector panel takes some time every time Playground mode is toggled, and there is no indication that the software is actually working at changing the panel during this time period. These settings can be tweaked to further fine tune the gameplay. Now, play the game again.

Adding a health bar

At this point of time, the spaceship can fly around and collide with objects. The asteroids move away when the ship bounces against them, and they can also bounce into each other. We will now add a health system to the spaceship, so that every time it collides against an asteroid, it loses health. We can call it something like shield integrity. In the Scene view, click on MyShip,
