

So many Asteroids!

An Asteroids clone

Asteroids was a game where you had a ship that had to tackle an asteroid field by blowing asteroids. It was an old and popular game, first released on arcade machines in 1979, but continued to be popular even on Windows desktop machines in the 1990s. We will now be using Unity to make a clone of this asteroids game, using the dogfight game as the starting point. Go to **File > Save As** and make a copy of the dogfight scene, called `sh_asteroids` (the sh stands for space shooter). Select all the asteroid Prefabs in the Hier-

All the asteroids exploding
