

Creating a new script

Using the Patrol Component gives you more control than say Wander. For the saucers, you can Check the Orient to direction box, which is not needed for the planets. Make sure the movements are all ridiculously slow, as you want the decorations to remain slight movements in the background, which will just fly past in passing. You do not want their energetic movements to dominate the scene. Place the objects all around the scene. For a neutron star in the middle of the track, we did something interesting. We added the rotate script, and used the Arrow Keys as the Type Of Control. The same controls to rotate the ship, also causes the star to rotate. This can be incred-
