- e. Direct Shader Cache
- f. Delivery Optimization Files
- g. Device driver package
- h. Downloads
- i. Language Resource Files
- j. Recycle Bin
- k. Temporary files
- l. Thumbnails

Note: The above list of items may vary on your personal computer.

- 9. Click OK
- 10. Click the Delete Files button.
All the files will be deleted.

Uninstall non-essential applications

Applications that are used frequently should be kept and the ones which you hardly use should be removed.

To uninstall the applications, follow the steps given below:

- 1. Open Settings.
- 2. Click on Apps.
- 3. Click on Apps and features.
- 4. The apps can be sorted according to the size of the files using Sort by Size view option.
- 5. Select the applications to be removed.
- 6. Click the Uninstall button.
- 7. Continue with on-screen directions (if applicable).

The above steps should be repeated to uninstall more than one application.

Remove unused languages

Languages that are not in use can also be removed to retain the storage of the system.

Follow the steps given below:

- 1. Open Settings.
- 2. Click on Time & Languages.
