

As soon as the above steps are completed, the device will not be able to hibernate and the available storage will increase as well.

Note: To revert back the hibernation, use the command: `powercfg /hibernate` on command prompt.

Deleting users

In the computer system, space can also be made by deleting accounts from users who are no longer using the system.

To delete the users, follow the steps given below:

1. Open Settings .
2. Click on Accounts .
3. Click on Family & other users .
4. Select the account name to be deleted.
5. Click the Remove button
6. Image
7. Click the Delete account and data button.
8. Image

The above steps help in deleting unwanted or inactive users from the computer system. Steps can be repeated to delete more than one user from the device.
