

the EDB board like the traditional blackboard, and also drag the student's screen to the middle and ask them some questions.

With the help of the EDB board, students can make use of the online tools for completing their class activities. Learning online becomes easy for them just as reading a book.

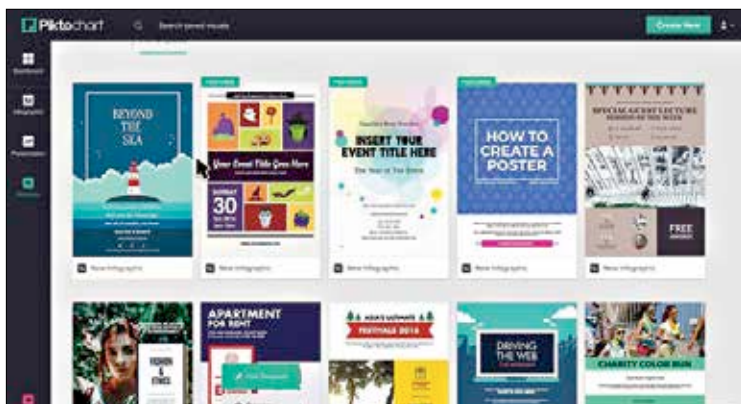

Schoology

This is a free learning management system which has numerous advantages. It helps teachers with study material creation and distribution along with providing student assignments and tracking their progress, among others. This tool has almost all the features that Google Classroom provides along with added benefits. Easy organization of content, inserting multimedia in the assignment description, recording videos, and audio clips on the platform are some of them.

Piktochart

Students, as well as teachers, can use this digital tool for creating visual materials such as presentations, posters, and infographics. It offers special plans for a team consisting of 25 or more members.

Other such software for presentation includes Microsoft PowerPoint and Apple's Keynote.
