

flashcards, etc. The app lets them study as well as assess their knowledge irrespective of where they are.

Padlet

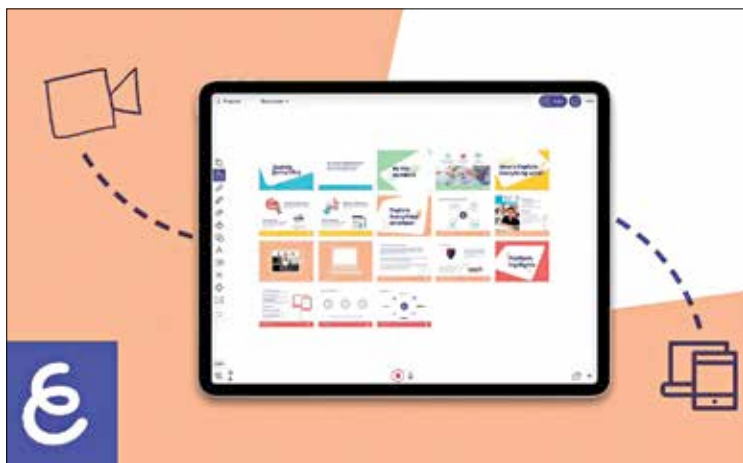

It is a digital pinboard where teachers and students can pin images, links, videos, text files, etc. The best part of this tool is that it promotes a sense of teamwork among the students so that they can work and brainstorm together. It offers options such as background customization to sand, wood, black-board, corkboard, etc. Teachers can also control who can access the board.

Pixton

This is an amazing app that enhances students' visual thinking and creativity. They remain fully engaged as it lets them create comics and story-books, which is not only fun but also educational. This free tool is best for enhancing the imagination of kids.

Explain Everything

As the name indicates, it allows teachers to collaborate and interact with their students in the virtual environment to explain any concept. They do it using the interactive whiteboard which promotes group activities. The drag and drop option makes everything very easy and spontaneous. It is possible to integrate the software with various apps too, such as OneDrive, Evernote, Dropbox, Schoolwork, etc.
