

BoomWriter

This is an excellent collaborative writing digital tool that children of all ages find useful. It is especially beneficial for the little ones who are hesitant to write. The tools allow students to compose a story as well as vote for the same of every person's version. It sparks interest among the students for writing.

Educreations

This interactive tool is meant for being used as a whiteboard as well as for screencasting. Teachers can explain any concept using it. They can even separately approach every student, and replay their work so that students can learn at their own pace.

Animoto

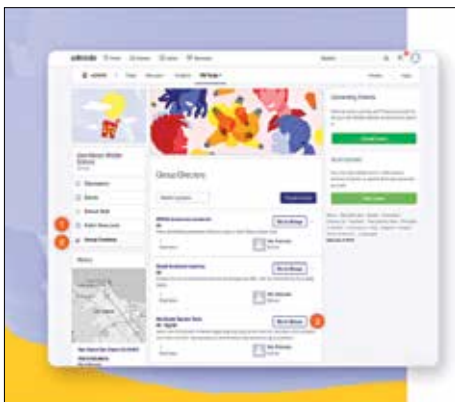

When teachers need to create animated videos easily, this is the perfect digital tool. It allows the creation of photo slideshows, adding texts, combining videos to produce engaging content for the students, etc.

Zoom and other pre-recorded video hosting options:

There are numerous options for hosting videos and integrating them into the learning management system. Zoom is one such tool for teaching a small group of students, live, or just interacting with one another. It also supports webinar-broadcast style sessions. Other similar tools include premium Skype account, Adobe Connect, Livestream, CrowdCast, WebinarJam for webinar-style presentations. Teachers can host pre-recorded videos through YouTube, Vimeo, and Amazon S3.

Edmodo

This is an education network that is suitable for the teacher, students, and parents too. Students can get access to various resources through the digital classroom environment. Since this has a resemblance to social
