

- AcceptFilter https none
- \$ sudo apt-get install PHPMyAdmin
- Include /etc/PHPMyAdmin/apache.conf
- \$ sudo service apache2 reload
- choco install Microsoft-windows-terminal

For example one can style in the console in the following way in the profile setting tab:

- "acrylicOpacity" : 0.2,
- "useAcrylic" : true
- "colorScheme" : "One Half Dark",
- "cursorColor" : "#FFFFFF",

- "cursorShape" : "bar",
- "fontFace" : "Consolas",
- "fontSize" : 10,
- "padding" : "0, 0, 0, 0",
- "background": "#002B36",
- "backgroundImage": "<insert image path here>"
- "backgroundImageOpacity": 1,
- "backgroundImageStretchMode": "none"

The main benefits of having a windows terminal console is:

1. Globalisation
2. Support 24/7
3. Rich text
4. Theming and customised styling
5. GUI
