

Each section represents specific information importance for the program:

```
man(1) man(1)
NAME
    man - format and display the on-line manual pages

SYNOPSIS
    man [-acdfFhkKtW] [--path] [-m system] [-p string] [-C config_file]
    [-M pathlist] [-P pager] [-B browser] [-H htmlpager] [-S section_list]
    [section] name ...

DESCRIPTION
    man formats and displays the on-line manual pages. If you specify sec-
    tion, man only looks in that section of the manual. name is normally
    the name of the manual page, which is typically the name of a command,
    function, or file. However, if name contains a slash (/) then man
    interprets it as a file specification, so that you can do man ./foo.5
    or even man /cd/foo/bar.1.gz.

    See below for a description of where man looks for the manual page
    files.

MANUAL SECTIONS
    The standard sections of the manual include:
```

Source: <https://busy.org/>

- **Name section represents:**

the primary information for the program or function and then is followed by the dash and a short description.

- **Synopsis section includes:**

a short overview of the program with available options, corresponding files, and prototype as well as return type.

- **Description section represents:**

detailed and reliable information about the program arguments, file formats and the use of algorithms.

- **Options section includes:**

several ways that a program may behave to get specific results. This also defines the scope of the Man page command or program.

- **Files section lists:**

all the corresponding files a function or program uses including startup files, configuration files, and operating files with their full pathnames.

- **Environment section:**

provides us with all the environment variables affecting the program behaviour in any way. These variables will have filenames, pathnames, and other default options for users to inform.

- **Diagnostic section includes:**

overview of all common error messages and the way for their solution. You must list all specific errors associated with this program or function.
