

- Step Two: Once you are logged in, you can click on the Settings (gear-shaped) icon which can be found on the top right of the page, under the profile picture.
- Step Three: Navigate to the “Themes” section and scroll through the various themes until you find a black one, titled ‘dark.’
- Step Four: Select this and enjoy the dark mode, which provides a simple black background to the entire Gmail application. This is particularly useful for AMOLED screens where black pixels are just turned off, saving you a ton of battery power.

We hope that you find this article useful and are now able to successfully toggle on dark mode across all your devices. **d**
