

session, you can see them by hopping from one page to another. You can restore the default viewing by clicking on the tab labelled Speaker View located in the same top-right corner.

7. Hide non-video participants

The problem with a video conference involving a large number of participants is related to screen cluttering. It can be quite distracting if some of the participants do not have cameras. To solve this issue, you can opt to hide the non-video participants. All you need to do is go to the Settings>Video>Meetings and select Hide non-video participants.

8. Share your screen

Zoom lets you share the screen with other participants. All you need to do is click the Share Screen icon on the toolbar or at the bottom of the meeting screen. You can customise what you desire to share right from your entire desktop to a particular window. You have to click the red coloured Stop Share button at the top of the screen if you wish to stop sharing.

9. Turn on the beauty filter

If you feel that you are falling short of being photogenic in the Zoom app, then you can use the Touch up My Appearance feature. This feature will subtly tweak your appearance and freshen up your look. It is quite similar
