

oped separate applications for UPI payments. For example, BHIM United Pay for United Bank of India, SBI Pay for the State Bank of India, and many more. Each bank has its separate registration and transfer features.

SBI Pay:

The State Bank of India has developed SBI Pay for UPI transactions. This app also allows non-SBI customers to use the UPI facilities with the help of VPA. It has an easy-to-use interface. It enables hassle-free registrations once the app is downloaded.

iMobile:

The iMobile app fulfils the UPI needs of all ICICI Bank customers. It is available on Google Playstore.

BOB UPI

The BOB UPI was developed by the Bank of Baroda and is available in the Google Playstore.

Axis Pay

Axis Bank has introduced one of the most user-friendly UPI apps for its customers.

PayTM BHIM UPI

India's most popular digital wallet, PayTM now allows UPI transactions as it has been integrated with the BHIM UPI platform. PayTM has allowed users to create their own BHIM UPI ID through the app and link their savings bank account to the BHIM UPI ID. All major banks accept BHIM UPI as a secure, easy, and fast way of transferring money. There is no need to provide personal information, like the account number, while creating your UPI ID on PayTM. However, it is crucial to make sure that the phone number is linked to the bank account.

PayTM has now allowed all PayTM Merchants to link their accounts, making the transactions easier. Also, there has been no upper limit on the
