

- The Tag deposit amount is refunded to users at the closure of the account.
- Toll amounts are automatically deducted from the user's account after passing through the toll.
- Convenience fees are levied across all the recharges and may vary from one transaction mode to another. Convenience fees are not included in the FastTag program but are charged by the payment gateway for the services. These convenience fees may change from one bank to another depending on the payment gateway used.
- Monthly passes are also available through the facility and are limited to toll plazas.
- Most of the tag issuers offer discounts that users can avail, and get more benefits. FastTags are generated with a validity of 5 years from the original date of issuing.

How to recharge your FastTag account?

Consumers can keep a certain amount in the mobile FastTag app wallet or can link it through their bank account. Here are the steps to recharge your FastTag account.

- Login on a particular bank website, FastTag mobile application, or specific online URL.
- Consumers need to add the right credentials with a user ID or wallet ID along with a password.
- Then choose the payment and top-up tab.
- Now click on recharge and choose the specific wallet ID to add money to your personal FastTag wallet.
- Once approved, the amount is then credited in the wallet for use on toll plazas.

Currently, users must maintain a prepaid FastTag account to pay for toll charges. The minimum amount for FastTags recharge is ₹100. Users with limited KYC holders have a limit of ₹10,000, while for full KYC users this limit increases up to ₹1 lakh rupee using any online or offline mode of transaction.

Banks and wallet accounts also have an auto-debit feature to maintain a specific amount in the FastTag account.

And as the vehicle approaches the toll plaza, users need to slow down their car and let the RFID scanner read the data from FastTag. If the light turns green then the vehicle is allowed to pass through. Otherwise, if the light turns red then stop the vehicle to let the manual scanner go through
