

AI-ML community to understand what is new in the world of ML. Try and attend meetups, meet and network with the experts in the industry; they will help you understand the subject better. Here are a few meetups and communities you can attend or join, respectively to learn more.

## **Data Quest**

Data quest is an online data science community. It is one of the biggest online Slack communities for data science and AI professionals. In this group, professionals share resources, tutorials and find other professionals to collaborate on similar interests and projects.

## **Global AI community**

As the name suggests, this community is aimed at connecting various AI communities with each other. This enables communities to network, collaborate, and understand various aspects of the fields from individuals all over the world.

## **AIMinds**

AIMinds is an initiative by Analytics India Magazine which is a monthly meetup aimed at promoting Artificial Intelligence development in India. They invite some of the best minds and well-known AI practitioners and researchers to exchange ideas and share knowledge. These professionals help budding and aspiring professionals to make it big in the AI field.

These communities and meetups will help you to network with many professionals. These meetups will also help you keep up with the major and recent developments in the field of AI from various professionals actually working towards making them possible.

Find, read, research as many resources as you can to make sure that you are never on the backfoot in the world of AI. All work and no play make Jack a dull boy. Well, that goes just perfect for an aspiring AI developer. Meet people in the same field, try and participate in online quizzes and communities, follow the field carefully, because AI is so much volatile and fast-progressing that it does not even take a week for something to go obsolete within weeks.

Here are a few websites and books you can refer for additional resources:

## **Altrends**

AI Trends is one of the blog websites you should keep a tab on if you want
