

race with the following AI courses that you can take over the internet from the comfort of your home.

E-Learning courses

Online education is becoming a norm over the last few years. One good thing about these courses is that you don't have to compromise with the quality of education; in fact, online platforms try to get experienced faculties and industry experts. We have a little list of our own compiled for you. Take a look:

1. PG diploma in Machine Learning and AI – UpGrad

UpGrad is a popular name in the whole online education scenario, especially over the last few years when the demand for it boomed. The PG diploma course by UpGrad is aimed at working professionals and aspiring ML developers, Data Scientists, AI architects, and so on. You also get to learn AI concepts like deep learning, model deployment, NLP, Reinforcement learning and other AI concepts in detail. You get to do this using Python, Tensorflow, MySQL and so on. At the end of the course, you get a PG certificate by IIIT-B which is one of the esteemed institutes of India.

2. AI for Everyone by Andrew Ng – Coursera

Andrew Ng is the co-founder of Coursera and an adjunct professor at Stanford University. He is also known for leading Google Brain, an initiative by Google to develop massive-scale deep learning algorithms. Coming back to the course, this one focuses on everything AI. It has explanations about AI concepts, basic terminologies, how it works in the real world, and everything you as a software engineer or an outsider should know about at the ground level.

3. Artificial Intelligence A-Z: Learn how to build an AI – Udemy

Udemy is a vast marketplace, and we all know that it has some fantastic courses lined up for everyone from learning basic Python to understanding digital marketing. It is also known for its A-Z series which focuses on teaching you everything you need to learn about a subject. It teaches concepts based on a real-life problem like self-driving cars. This course is aimed at people who appreciate project-based learning and learning concepts concerning the application.
