

4. Google AI education

Google is known for its initiatives to shape the technology world. It has a set of tools under its brand wagon, and we all know most of them. Google is also conducting instructor-led training for free for people who might not be able to afford courses but have the capability of capturing information in its raw form. Google AI education is also a part of this program where the expert instructors help you understand AI coding basics. This course is aimed at beginners who might have little to no information about the basics of AI coding, but hungry to learn new concepts and take their career to new heights.
