How to become a better data scientist?

Learn what it takes to thrive in the lucrative career as a data scientist

Introduction

In 2012, the Data Scientist profession was labelled as the 'sexiest job of the 21st century' by the Harvard Business Review. Indeed, it has lived up to its reputation. Data Scientists are the modern-day wonders with unmatched skills, make smarter decisions, drive business growth, and earn the highest packages in the industry has to offer.

The primary goal of data science is to assist companies to grow quickly and make precise decisions. In a highly competitive market, a company with
