

Appium, an overview

All you need to know about Appium, an open-source automation framework

Smartphones have become a crucial part of our lives because they provide instant solutions to many problems. Not only solutions but they also open up new avenues for us to go about many things in our life.

We depend on our smartphones so much because they host several apps which cater to our needs and purpose. Talking of apps and their development process, they need a strong backend to support them. It allows developers to cater to the growing industry of tech-consumerism. As per a report, application downloads are going to increase from 200 billion in 2019 to over 258 billion by 2022. The huge numbers speak of the dominance of mobile applications.
