

using the 'browse' button. Click on OK to create the new SOAP project. Now, you might be wondering what WSDL is. WSDL stands for Web Services Description Language. WSDL describes a web service using XML elements such as <types>, <message>, and <binding>.

3. Next, right-click the project file that you just created and select 'New TestSuite.'
4. Now, add a new test case to the test suite. Right-click on the 'TestSuite
