

test steps to the test case. Expand the ‘Test Steps (1)’ tab and right-click the ‘Request 1’ option. Select ‘Insert Step’ and then ‘REST request.’

7. This will open the ‘New RestRequest’ dialogue box with the available endpoints. Select the relevant endpoint and click OK.
8. Run the test step by clicking on the green arrow icon.

9. Now it's time to add endpoints. Click on the ‘Endpoint Explorer’ button -> Select ‘GET’ method -> Add <http://petstore.swagger.io/> in the endpoint
