

MAXIFS, MINIFS, SWITCH, and TEXTJOIN – to make manipulating data easier.

7. Inking functionality

There is an inking function added to Microsoft Office 2019. If you have a touch-enabled device, you can use ink tools>pen to highlight text, delete words, etc.

What is Microsoft Office 365?

The latest version of Microsoft Office is called Microsoft Office 2019. There is a lot more to Office than we realise, especially since Microsoft released Office 365.

Office 365 is a cloud-based version of Microsoft Office, and it uses the subscription model. Microsoft prefers that users would adapt to using the web-based Office 365. Various versions of this suite have been released. Most people still use any version of the suite as Microsoft Office, which makes it difficult to distinguish between the editions.

Office 365 subscribers always get access to the latest version, currently Office 2019. The subscribers get more frequent software updates than other users. Thus, subscribers have access to the latest features and fixed bugs.

The new features of Microsoft Office 365 since 2018

1. Real-time co-authoring

Now, users can co-author in Word, Excel, and PowerPoint and see each other's changes as they happen with real-time co-authoring.

2. Chat in Office applications

Microsoft Teams in-app integration with Microsoft Office 365 helps the users to chat, share live screens and have audio, video conversations with each other. You don't have to close the other applications to do this.

3. Share files by inserting links to stored files

With this feature, there is no requirement of email attachments. Users can easily share a document for co-authoring. Upload the file to cloud storage of Office 365 and share the link of the file stored on the cloud so that users can access it for co-authoring.

4. Power map in Excel

It is a powerful data visualisation feature in Excel. It is used to analyse,
