

any word editing, spreadsheet or presentation software. Multiple types of pens, pencils and highlighters are available at the service of the user. The sizes of the pens range from 0.25 mm to 3.5 mm, and they can be used via mouse, writing pad or touchscreen. The digital inking capability of Microsoft Office also allows users to edit their writings, write in different colours and styles and even add ink effects.

5. Accessibility checker:

When sharing your document, it is essential to ensure that people of all abilities can read it. Hard to read documents can lead to misinterpretations as well as misrepresentations. The Accessibility Checker is a tool for Word, Excel, PowerPoint and Outlook, which checks for you the accessibility of the document. It then presents you a list of all the accessibility issues with each page, so you may address the errors and problems before sharing your document. It is always recommended that the accessibility checker be run on all the documents that are

scheduled to be shared. In Microsoft Office 2019, the Accessibility Checker has become easier to use than ever. It is now available in the Review Tab, under the Check Accessibility option. It provides you with methods to fix the accessibility issues with your documents in the form of a list.

6. File versions:

Many users face the issues of saving a file after editing it, but then needing to go back to the previous version. Previous versions of Microsoft Office would go so far as to even disable the undo button as soon as a file had been
