

comprehension of the data as well as add a visual as well creative appeal to their workbooks. Once you insert a particular 3D model, you have the liberty to rotate said model through a complete 360 degrees and visualise it from any angle that you wish to. This greatly enhances your personal engagement and interaction with the concerned database too.

## **Ink improvements**

Microsoft first introduced Inking attributes in Microsoft Office 2016. Basically these features allow you to pick an ink colour, pen thickness and other related features as per your preference or requirements. Ever since, Microsoft has been on a mission to make more improvements to this by adding relevant features and introducing upgrades with every subsequent Office suite that gets released. The ink improvement features in the new Excel 2019 are listed below:

### **Novel ink effects**

New ink effects allow you to make use of features like metallic pens as well as visually appealing ink effects such as rainbow, galaxy and, lava to name a few. Many more shades like gold and silver to help you add a whole another dimension of vitality to your workbooks and presentations.

### **Digital pencil**

The digital pencil feature allows you to write and sketch out your ideas manually while granting you a pencil texture all the while.

### **Customisable, portal pen set**

It goes without saying that all of your projects have their own set of needs, which are more often than not, mutually exclusive. In order to accommodate this, Excel 2019 allows you to create and maintain your very own set of personal pens that best meet your needs. The fact that Office recalls your specified pen set across all Windows devices that you possess and across all its platforms such as Word, Excel and Powerpoint, is an added bonus.

### **Ink equations**

Sometimes you find yourself having the need of including a mathematical equation in your document. Now this task can be accomplished with consummate ease by making use of Excel 2019's Ink Equation feature. For every time that you have to add a complicated math equation to your workbook,
