

the video, you can now choose 4K as an option. The resolution of the created video will be 3840x2160.

9. Recording:

If you wish to record your slideshow while you are delivering it, and also record a narration along with it, you can activate the Recording tab in the ribbon. The recording option is a particularly good alternative to the screen recording feature that a number of other software provide. The greatest feature of the recording option that is provided by PowerPoint is the capability to make a custom slide show with individual slide timings and narration. You can also choose the Rehearse option before beginning the recording in order to ensure that the slide timings you have set are appropriate.

10. Digital pens:

PowerPoint 2019 also comes with an optional Draw tab, which allows users to use digital pens to write or draw on the screen. This option is particularly useful if you have a touchscreen laptop or a digital drawing pad, but you can also use your mouse to draw on the screen. The feature in the Draw tab that has been added in PowerPoint 2019 is that the variety of pens that you can use for drawing has been increased considerably. Pens, highlighters and pencils of different thicknesses, styles and colours can be used to draw on the screen. The available pens are in line with the standard thicknesses used by professionals, ranging from 0.25 mm to 3.5 mm.

11. Ink effects:

For more artistic users, PowerPoint has added ink effects to its colour repertoire. Different glitter effects such as rainbow, galaxy, gold and silver are present in the ink effects option if you want your drawing or written text to have an extra glowing edge.

12. Segment eraser:

PowerPoint is known to be particularly attentive toward even the smallest of issues
