

have happened in the past. To customise reminders, perform the following steps:

- Go to **File > Options > Advanced**

Here is how you will see reminders. Now, you can customise reminders as per your preferences.

See meeting request responses when you are not the organiser

Sometimes, there are meetings you are looking forward to. For some others, there is no way out.

And then, there are meetings where the value addition becomes manifold if there are some specific others joining the meetings. It could be a new job, and you are just a silent observer, soaking everything as the days go by.

When you are not the organiser, you may want to know who else is joining the meeting. You can do this now, even if you are not the organiser, from the Tracking tab in your Calendar, where you see the response of the recipients of the meeting invite.

Automatic download of cloud attachments

Microsoft Outlook gives the sender an option to attach a file in an email message directly from the cloud. If this is the case, the attachment may be a link to the file that you get. When you drag and drop the attachment, Outlook automatically downloads a copy of the file on your computer.

These are just a few of the many features that Microsoft has introduced in Outlook 2019, that can help you become more productive at work. Microsoft seems to be committed to see that it is continually improving its offerings. **d**
