

Timeline bar labels

Timeline Bar Labels make it easy to communicate through the course of the project. This bar can be labelled along with showcasing the progress of the task, on the task themselves, as it makes it easy to quickly illustrate the project plan.

The latest functions of Microsoft Project 2019

Compared to the previous version, Microsoft has made significant improvements in terms of performance and technology considering its project management tool. This on-premise solution works well for project portfolio management, and integration for everyday work. This will enable the team members or project participants to quickly get started, and prioritise the portfolio investment of the project.

- Multiple settings for email notifications
- The configurable granularity of the time-phased information in the reporting database
- 450 custom fields along with the lookup tables
- Availability of resource engagement application programming interface
- The team tasks can be strictly accepted by multiple resources
- Name of the summary task as a column
- Predecessor and successor along with pick lists
- Labelling the timelines and percentage of completion of the timeline view

What's new in Microsoft Office 365?

There are lots of exciting new features that have come along with Microsoft Project 2019. The subscribers of this tool will get direct access to the updated features and components automatically, whereas non-subscribers can buy the next version of this tool to get access to its features.

- SharePoint integration fixtures, and auto filter improvements
- Implementing the inactive tasks, and undertaking quick access toolbar enhancements
- Recurring the improvements and various fixes for the save
- Improving auto filter, and implementing Agile in Microsoft Office 365
- Enhancing grid editing and navigation through the arrow keys
- Improving logo appearance and agile functionality

Conclusion

Migrating from the previous versions of Microsoft Project, the 2019 version has a lot more to offer for project managers and teams at present.
