

What's new in Visio 2019

Towards building better visuals to enrich all your documents

Vision Standard 2019 and Visio Professional 2019 were launched by Microsoft post the launch of Microsoft Office in October 2018. These two versions of Visio 2019, which were launched during this time, were Visio 19 Professional and Visio 19 Standard. These two editions have the same features as that of Visio Online Plan I and Online Plan II.

The update launched by Microsoft does not show significant changes, so let's start with a small introduction of Visio, especially for those who are not familiar with the software.
