

available in the standard version are - basic flowcharts, basic networks diagram, organisation chart, and general multi-purpose diagrams.

Visio Professional 2019

Visio Professional is rich in diagrams that can be used by a number of users. The professional diagrams can be created and shared among the team members through Visio Professional. Along with all the features of the standard version, this professional version also includes additional features like updated shapes, styles, and templates.

New features of Visio 2019

Let us look at some of the new features in Visio 2019.

- Fresh template for education category

In 2017, Microsoft introduced the new category of Education in Visio Pro. The category was introduced for Office 365 or Plan II options. In Visio 16, these features were not available; even in Visio 13 or Visio 10 users could not get this template. This is a new category template in Visio 19.

- **Flowchart category - new diagram template**

Some flowchart templates include cross-functional and basic flowchart data visualizer. Flow charts are used to depict or represent the data flow, and these templates also are designed in a way so that designers can represent their data flow smoothly. The Visio data modeller can create cross-functional and basic flow charts through a process or flowchart.
