

data loss prevention, retention policies, information barriers, legal hold, and eDiscovery.

The data remains encrypted on all occasions, whether it is in transit or at rest. It suffices all regulatory compliances of EU Model clauses, SOC2, HIPAA, and ISO 27001.

### **Collaborate with vendor clients and suppliers**

It is also possible to invite external users for a chat over email. Teams will tag them as guest users. It is a highly beneficial feature when it comes to communicating with third parties and other vendors.

You can provide a guest user access to existing channels and teams. Hence, it has the provision of letting teams in your organization collaborate with stakeholders, contractors, and clients. It will be possible for admins to control guest features. Hence, it will not compromise the integrity and safety of confidential business information. Anyone can participate as a guest in Teams provided they have a consumer or business email account on Outlook or Gmail.

### **Automatic setup across the suite**

Once you create a team with Microsoft Teams, you are going to have access to Office 365 elements. It is inclusive of a shared Plan, shared OneNote notebook, and a SharePoint team site.

### **Emailing a Teams channel from Outlook**

In Microsoft Teams, you can forward an email to the channel. There will be instances where a need will arise to forward an email from Outlook to Teams. For instance, you may be communicating with an external vendor or a contract in Outlook, and there is a necessity to forward important information to the Microsoft Teams internal staff. There is no need for copy-pasting messages into Teams. Outlook possesses an in-built feature for dispatching a quick email to a channel.

### **Find the required information on demand**

If you need to find relevant information from files and past conversations, then you need to use the search function in Microsoft Teams. It will be possible for you to directly schedule meetings for the group, where every member of the team will be automatically invited. The content search capabilities will be providing a way for searching for information in Microsoft Teams, which is inclusive of:
