

to synchronize your Mac or PC. Besides, you can create data views, 320 file extensions, work with metadata, view a document's lifecycle signals, select files for pinning at the top, review on-hover file cards, and perform actions like check-in and check-out.

Recording storage

This application from Microsoft has a feature that allows users to record group calls and meetings. It permits the recording of audio-video and allows screen sharing. It has a built-in feature of cloud recording, which is enabled by default. It implies that all the recordings will get stored in the respective in-region data center.

The Power BI tab for Teams

In Microsoft Teams, the Power BI tab is a great new feature through which everyone in the channel or chat will be capable of tracking and finding the data required for completing their daily task. The new tabs provide added support for reports and new workspace experiences in the Power BI apps. Hence, it is seamlessly easy to add it to your chats and channels. The tab also renders a helping hand when it comes down to managing organizational change. The data that is required will be right there and available on demand.

App pinning

The Teams app bar has the provision of pinning personal apps. For this purpose, all you need to do is locate the app that you want to pin for convenient access, right-click on the app icon and choose "pin". To facilitate ease of access, the app icon will be there in the Teams app bar. Moreover, there is also a provision of pinning apps into relevant channels and chats. All you need to do is right-click on the app icon and select pin. Even when you navigate away, the app icon will remain so that you can switch back to it easily. You can also make the most of the facility to pin apps in relevant channels and chats.

Shifts

The logging of employees working hours can be a time-consuming affair. An organization may have to consume surplus resources in setting up a system. It can be a cause of headache for both the employer and employees. To offer a comprehensive solution, Microsoft Teams is providing you with a simple, intuitive, and convenient timesheet for feature recording. It is known as Shifts.
