

and channels you need to make. You can input the general objectives of your organisation, and just an overview of the things you want to achieve. After this, you can use the channel to relay information that applies to everyone on the team. Use the private channel for collaborations within a department, or for facilitating work on a particular project.

A general channel is useful when you are onboarding a new team member. You can have all the relevant information guiding them. On Teams, you have the option of showing the history of conversations to new members. You cannot remove the general channel. It appears on the top before others.

Together mode

Together Mode makes participants feel close, even when they are apart. The feature allows you to add a common background for all the participants. This sets the tone for the meeting. For example, if it is a casual meeting, you can change the background to a sushi restaurant to get the feel of a lunch meeting. Not only that, for college students missing their college, you can add a picture of your classroom as a background to feel closer together in a familiar space.
